

GET YOUR VIP PASS TO SUCCESS!

IT and digital networking courses are available at colleges, high schools, and other educational centers near you.

It's your future.
Join the next
generation of
tech.

Since the program began in 1997, over **9 million** students have enrolled in Networking Academy courses. This public-private partnership is Cisco's largest corporate social responsibility program.

If you think digital networks are important now, soon there will be over **50 billion connections** between people, places and things.

Get a **VIP pass to your future** by enrolling in Networking Academy classes offered at many campuses near you.

Networking knowledge will enhance your career in any field, because every organization relies on connectivity for success.

With the right skills, you can embark on a well-paid career in ICT (information and communications technology).

You can choose to join a high tech firm, or bring these skills to a different field that you love, or even start your own company.

Right now there are over 1 million students currently taking Cisco classes at high schools, colleges, universities, and other educational centers.

Leverage the skills gap.

Digital information grew by 5000% in the last decade, but the number of IT professionals increased by only 1.5%. This means big opportunities for you:

- Global companies run their entire operations on networks, cybersecurity is vital
- Smart grids are greening the power industry
- News, entertainment and gaming continue to expand bandwidth requirements
- Nonprofits deliver access and technology to solve problems for underserved populations
- Video presence systems and collaboration tools reduce travel costs
- Schools, governments, small businesses and home offices all need setup and support
- Cloud computing empowers mobility, software as a service, data centers, virtualization, and much more

Want to stand out? Get certified.

Courses can lead to globally-recognized Cisco certifications — a powerful way to differentiate yourself on college applications and in the job market.

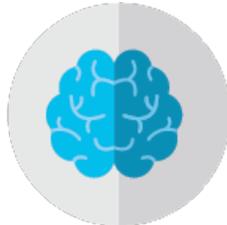

WHAT YOU CAN EXPECT

Learn by Doing

Games, simulations, hands-on labs, and competitions— you won't get bored.

Extend Your Reach

No matter what your interests are, these classes will add to your skill set. You don't have to be a hardcore techie.

Join a Community

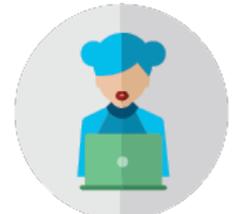

Connect online with like-minded Networking Academy students and instructors around the world.

Make a Difference

Here's your chance to build expertise needed to solve global social problems.

Equalize Your Opportunity

Women are finding a rapid path to leadership in technology fields.

“Cisco courses have opened my eyes to so many different career paths, and now I'm in a field that is actually growing fast.” — NetAcad student
